# Palestext.py - Analysis of Country Opinion on the "Palestine Question"
## Andrew Loose

Sankey diagram comparing top 5 most used words in each text

- General similarity in text due to how countries speak at the UN - extremely formal, relatively hope focused
- Peace, Humanitarian, Palestinian, People, and Gaza are the most talked about terms

Data Source: UN Data Collection on "Question of Palestine" : https://www.un.org/unispal/data-collection/

Which country statements are closest?

- China and Russia in 2013 closest, but have extremely low similarity in 2023
- USA and Brazil in 2013 and 2023 both have similar statements, even if conclusions are different (USA in support of Israel, Brazil in support of Palestine)
